SUMMARY

Final-year AI & Machine Learning undergraduate with hands-on research experience in GenAI, Agentic AI, and LLM/VLM systems. Built and deployed RAG pipelines, multi-agent architectures, and computer vision models (gaze estimation, CNN-based classification) using Python, PyTorch, and TensorFlow. Experienced in algorithm design, data curation, and scaling models from prototype to production API, with a consistent record in national-level AI/ML hackathons.

SKILLS

- **AI/ML & GenAI:** Generative AI, Agentic AI, LLMs, VLMs, Retrieval-Augmented Generation (RAG), Prompt Engineering, LangChain, LangGraph, CrewAI, Multi-Agent Systems, OpenAI API, Google Gemini API.
- **Deep Learning & Computer Vision:** PyTorch, TensorFlow, scikit-learn, Convolutional Neural Networks (CNNs), Computer Vision, Real-Time Inference, Feature Extraction, Model Optimization.
- **Languages & Algorithms:** Python (Intermediate-Advanced), Java, TypeScript, C, SQL, Data Structures and Algorithms, Algorithmic Problem-Solving.
- **Data & Backend:** Data Curation, Data Processing and Management, FastAPI, Flask, RESTful APIs, Pydantic, asyncio, PostgreSQL, MySQL, Vector Search, Embeddings.
- **Tools & Deployment:** Git, GitHub, Docker, Azure App Services, AWS, Google Cloud Platform (GCP), Vercel.

EXPERIENCE

Vinidra Softech

AI Engineer Intern

May 2026 – Present

Bengaluru, Karnataka

- Designed and optimized LLM-driven Geo-Discovery algorithms integrating OpenAI, Google Gemini, and OpenRouter APIs, engineering strict prompt constraints to reliably parse unstructured model outputs into validated JSON schemas.
- Prototyped and scaled a concurrent Ad-Discovery data pipeline using Python, asyncio, and ThreadPoolExecutor to retrieve brand promotional assets across YouTube, Google Images (SerpApi), and Meta, cutting API fetch latency by 60%.

Primetrade.ai

AI / ML Analyst (Project)

Jan 2026 – Apr 2026

Remote

- Built a data ingestion and curation pipeline integrating 3+ external APIs to process 5,000+ daily financial data points, structuring 50+ GB of raw data into context-aware analytical outputs and automated evaluation metrics.

Brainium Club, BMSIT

Treasurer & Core Team Member

Jan 2024 – Apr 2026

Bengaluru, Karnataka

- Coordinated with college administration to secure and manage funding for 5+ technical workshops and events, communicating budget needs and outcomes across club members, peers, and faculty stakeholders.
- Collaborated with a cross-functional core team to plan AI/ML workshops for 100+ students, applying organizational and analytical skills to align event goals with available resources.

PROJECTS

OpenGazeX: Real-Time Eye Gaze Tracking

[PyTorch, OpenCV, Computer Vision]

- Designed a real-time gaze-estimation pipeline combining deep learning and classical computer vision, implementing eye-landmark extraction, gaze-vector inference, and latency optimization for live webcam input.

BioBloom (AgriGain): Agentic AI Research Pipeline

[LangChain, RAG, Multi-Agent, Python]

- Engineered an agentic Retrieval-Augmented Generation system synthesizing 400+ research papers with real-time market data, designing modular reasoning pipelines and orchestration logic.
- Conducted experiments on retrieval accuracy and prompt structure to solve open-ended data-classification problems, reducing manual research time by 15+ hours weekly.

NetCDF RAG Pipeline: Scientific Data Retrieval-Augmented Generation

[Python, Azure, Vector Search]

- Architected a RAG pipeline to parse, embed, and vector-search 50+ GB of scientific spatial-temporal (NetCDF) datasets, deploying a continuously available structured-output LLM reasoning API on Azure App Service.

EDUCATION

BMS Institute of Technology and Management (BMSIT)

2023 – 2027

B.Tech in Artificial Intelligence & Machine Learning (USN: 1BY23AI039) | CGPA: 8.36

Bengaluru, Karnataka

- **Certifications:** Microsoft AI in Fabric (2026), NPTEL LLMs (2026). **Hackathon Awards:** 1st – FORGE-X (CMRIT), 1st – ImpactX25 (RNSIT), 3rd – HACKIO (KSSEM).
